Overview of the first quarter of fiscal year ending September 30, 2020

(Period from October 1, 2019 to December 31, 2019)

Looking at the Group's business environment for the first quarter under review, subscriptions by smartphonebased paying subscribers remained sluggish mainly because smartphone penetration rates remained high and there is a requirement for large mobile phone carriers to separate communication charges and handset prices.

Given this background, the Group worked continuously to raise the average revenue per user (APRU) by improving the video lineup of "music.jp," a one-stop online store offering music, videos, and books and comics, and further control advertising expenses by enhancing promotion strategies for subscriptions through mobile phone stores with a high ratio of acquiring efficiency of paying subscribers.

Net sales stood at $\pm 6,104$ million (down 11.0% year on year) as a result of a fall in the number of paying subscribers from the same period in the previous year, although the number of paying subscribers to smartphones increased 0.13 million from September 30, 2019, to 4.05 million as of December 31, 2019, due to the effect of accepting the transfer of businesses such as the "musico" music streaming website, thereby raising the number of paying subscribers to 5.0 million (up 0.21 million year on year).

Gross profit decreased 14.4% year on year, to ¥4,477 million mainly due to a fall in net sales.

Operating income came to ¥586 million (down 29.3% quarter on quarter), chiefly due to the decrease in gross profit, although selling, general, and administrative expenses were successfully controlled against the backdrop of a decline in advertising expenses from the year-ago level as a result of subscriptions by smartphone-based paying subscribers through mobile phone shops remaining sluggish due to the effect of the separation of communications and terminal devices, and other factors.

Ordinary income decreased 53.4% year on year, to 404 million yen, reflecting the posting of a share of the loss of entities accounted for using equity method mainly associated with one-time amortization of goodwill due to the book value depreciation of Pocket Queries Co., Ltd. after it became an equity method company, in addition to a decline in operating income.

Profit attributable to owners of parent stood at ¥231 million (down 57.4% year on year), chiefly due to a decrease in ordinary income.

(Note) The Group's quarterly results under review have been compiled as those of a single segment of the content distribution business. However, it plans to indicate them as those of multiple segments in the future. In doing so, for reference, the Group has decided to disclose operating results by business unit to ensure that realities are understood more clearly with respect to the Group's net sales and profit, starting from this quarter. Specifically, net sales and profit are shown for the three business units (content business, healthcare business and other businesses) classified according to the difference in the services provided.

(2) Explanation on financial position

Assets, liabilities and net assets

At the end of the first quarter under review, total assets increased ¥2,989 million from the end of September 2019, to ¥30,469 million.

Current assets decreased ¥235 million, mainly reflecting a decrease in cash and deposits in spite of an increase in other asset including mainly accrued consumption tax, accrued corporate tax, and advance payment.

Non-current assets increased ¥3,225 million, due chiefly to a rise in goodwill.

Current liabilities increased ¥2,718 million, primarily reflecting an increase in accounts payable other in spite of a decrease in income taxes payable.

Non-current liabilities increased ¥25 million, chiefly due to a rise in net defined benefit liability.

Net assets increased ¥245 million attributable to a rise in capital surplus, a growth in non-controlling interests and ¥231 million posted as profit attributable to owners of parent, which offset cash dividends paid.

	Total assets	Net assets	Equity ratio
	Millions of yen	Millions of yen	%
As of December 31, 2019	30,469	22,039	65.2
As of September 30, 2019	27,479	21,794	72.3

(3) Explanation of future forecast information including consolidated forecast

In the second quarter and thereafter, the Company will continue to attach importance to the efficiency of the acquisition of paying subscribers on smartphones and working on increasing average revenue per user (ARPU) in the content distribution business where the overall number of paying subscribers is expected to continue to fall, in addition to continuing to focus its efforts on expanding sales in the healthcare-related service business.

The healthcare-related service business, which the Company is engaged in with a medium-term perspective, has strong growth potential over the longer term and may move toward a stock type business with the provision of long-term support according to customers' life stages. Accordingly, the Company is committed to implementing various measures in order to achieve sales growth.
